

低矮车身

LOW-HEIGHT BODY OF MACHINE

我们设计的 HY850推砂机，针对船厂现场环境低矮的特点，在不影响操作舒适性的前提下，将HY850推砂机的车身高度设计为1460mm，使HY850可以进入到各种低矮的环境作业，还不影响驾驶员视线（是同类产品中视野最开阔的），HY850是真正意义上的专业推砂机。

In accordance with the low-height environment in shipyard, under the premise of without influencing comfortable operation, we design HY850 Bulldozer. Its height to top of cab is 1460mm which doesn't influence the operator's line of sight. It has the best line of sight among similar machine. And this just right height allows the machine go into all kinds of low-height areas to work. HY850 is truly a professional Bulldozer.

封闭驾驶室

CLOSED CAB

HY850推砂机采用了全封闭式的驾驶室，避免作业过程中，飞舞的灰尘对驾驶员人员的损害，而且驾驶室内配有风扇和选配暖风，使操作环境更舒服。

Full-enclosed cab is utilized in order to avoid dust damage to operator during operation. And the cab is equipped with fans and optional heater which make operation more comfortable.

主要液压件国际著名厂商制造，性能稳定

MAJOR PARTS FROM FAMOUS MANUFACTURE

HY850采用先进的静压传动技术，其核心部件为双联柱塞泵，采用国际著名液压件制造商生产，确保性能稳定。

HY850 Bulldozer use advanced hydrostatic transmission technology whose core component is double-piston pump. This pump is manufactured by well-known international hydraulic manufacturer to ensure machine's stable performance.
